

SPECIFICATION

testing range	0,00 ~ 4,00 ‰
accuracy	+/- 0,07‰ at 0,5 ‰ w 25°C
sensor type	electrochemical
power supply	two alkaline batteries AAA 1.5V
dimensions (W/H/L)	47 x 114 x 24 mm
weight	84g without batteries
re-calibration	every 12 months or every 500 measurements
require mouthpiece	yes
other	self-monitoring of the sensor battery level control airflow control temperature protection

GTX ORIGINAL is a skillfull mix of attractive appearance and latest measurement technology. Although small (one could say pocket-sized), it proves to be as reliable as much bigger devices.

Eye pleasing housing made of rugged plastic conceals high quality components and a stable electrochemical sensor for accurate results - with a wide measuring range (0 to 4 per millimetre) and low measurement error. These are shown on the easy-to-read device display.

The breathalyzer itself ensures the correct course and controls the correctness of its own operation.

The breathalyzer is calibrated before packing and ready for use out of the box. There are also some hygienic mouthpieces for repeated use by several people included in the package.
